Room Does not have a PTAC unit

Pattern Intelligence

- Total open work orders in source report: **275**, with **34** marked urgent.
- Executive threshold (30+ days): **14** item(s) across **9** hotel(s).
- Regional threshold (14+ days): **30** item(s) across **15** hotel(s).

- Most concentrated aging backlog is at **Jacksonville - Shamrock** with **5** item(s) currently at the 14+ day threshold.
- PTAC / HVAC-related items appear repeatedly in the aged backlog, with **1** aged item(s) tied to that category.

Recommended Actions

- Escalate any **urgent** item that reaches 14 days old into same-day regional review instead of allowing it to roll deeper into backlog.
- Assign one owner per hotel for aged work orders and require a daily status comment until closure.
- Separate recurring PTAC / HVAC parts shortages from normal room-turn tasks so material constraints do not hide in general backlog.
- For the executive view, keep the 30+ day section intentionally short and exception-based. If that section is empty, leadership should read that as backlog still recoverable.
